

# enabling enterprise

enabling students to succeed through enterprise

## School Leader Brief

### Introduction

Started and run by teachers for teachers, Enabling Enterprise seeks to enable students to succeed in life by developing the enterprising skills and aspirations they need. We do this by bringing practical learning and skills development into areas of the curriculum where they wouldn't traditionally be found. We offer GCSE-equivalent accredited packages for English, Maths, Science, ICT, French, Spanish, and general Enterprise.

### Our Packages

We remove the need for expensive external providers, by giving teachers everything they need to deliver the programme including a day of teacher training and full teaching resources for weekly workshops, and schemes of work that develop links to the subject curricula. We also organise three trips over the year to prestigious supporting organisations including UBS Bank, Freshfields law firm or Oliver Wyman consultants.

### Achieving school priorities

Our courses:

- Fully embed enterprise throughout the curriculum at KS3 or KS4
- Are proven to develop student skills
- Help achieve the PLTS framework and include work-related learning
- Can be an addition to Diploma courses
- Contribute towards GCSE results
- Ensure a wide curriculum

### Costs and Registration

Our standard courses cost around £1,400 each for an annual subscription (2010-11), including teacher training, three termly events, and a year's worth of teaching resources, making them excellent value.

We can also offer extras like wider all-school training on practical learning, or bringing events to you.

To register, follow the links below.

Fuller information packs, case studies, exemplar resources and details about our nine different courses can be found at:
