

enabling enterprise

enabling students to succeed through enterprise

Teacher Brief

Introduction

Enabling Enterprise seeks to enable students to succeed in life by developing the enterprising skills and aspirations they need. Started and run by teachers for teachers, we found practical learning to be a great way to re-engage students and develop their skills. We also accredited our approach to boost students' GCSE results and organised events with prestigious organisations to shift student aspirations.

Every subject

We offer year-long GCSE-equivalent accredited packages for English, Maths, Science, ICT, French, Spanish, Humanities and general Enterprise. We are currently developing a programme for Primary schools too. Each course fits snugly into the existing subject curriculum, and uses a central project – whether creating a website in ICT, starting a business in Enterprise, or writing a yearbook in English.

Achieving teacher priorities

Our courses:

- Re-engage and stretch your students in lesson time or after-school
- Will boost your GCSE results through accreditation
- Fully embed enterprise throughout the curriculum at KS3 or KS4
- Help achieve the PLTS framework and include work-related learning
- Can be an addition to Diploma courses

Our packages

We give teachers everything they need to deliver the programme including a day of teacher training and full teaching resources for weekly lessons, and schemes of work that develop links to the subject curricula. We also organise three trips over the year to prestigious supporting organisations including UBS Bank, Freshfields law firm or Oliver Wyman consultants.

Fuller information packs, case studies, exemplar resources and details about our nine different courses can be found at:
